

# Transitioning to Terrestrial Life

- Bio Realm = Photosynthesis
- Course = Bio 121
- Strategy = Think-Pair Share
- Audience = small group 2-3
- Length = 10 to 15 minutes (instructor discretion)

# Desert Plants

- Think-Pair-Share:
  1. Imagine plants living in the desert.
    - Describe the abiotic factors of their environment
    - Describe issues related to photosynthesis that these plants must deal with.
  2. Brainstorm possible solutions to these problems
